Hello,

I'm a resident of Beaverton but have lived in the wider Portland area my entire life. I was born here. Now I'm here as an adult, own a house, and I don't like the way the quality of the local river is going. The EPA exists to protect not only the environment but people as well from pollution. Please reconsider your plan.

1. The draft cleanup plan leaves far too much of the river contaminated for generations to come. Portland Audubon recommends that at least 1,000 acres of polluted sediment be removed from the river.
2. The draft cleanup plan relies far too much on "monitored natural recovery," a "do nothing" strategy that leaves pollution in the river in the hopes that it will either be covered over or flushed downstream.
3. The Cleanup Plan must result in the removal of the Fish Consumption Advisory so that eating fish from the Lower Willamette is just as safe as eating fish from anywhere else in the Willamette River System and this must occur within a 10-20 year time frame.
4. Entities with liability for the pollution must be held accountable and pay for a comprehensive cleanup that will protect the health of our communities, our environment and our wildlife.

Thank you,
